

School District Income Taxes

35%

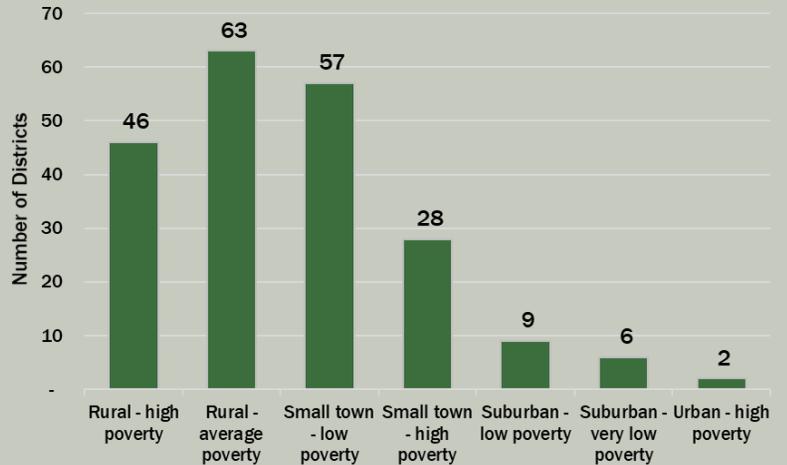

of Ohio's school districts levy an income tax.

Those that levy them tend to be rural or small town districts with relatively small student enrollment

Of the 211 school districts with an income tax...

92%	are rural or small town districts
69%	are at the 20-mill property tax floor for at least one class of real property. <small>*Real property taxes for floor districts generally grow at the same rate as property values (tax reduction factors do not apply).</small>
46%	enroll less than 1,000 students

Income Tax-Levying Districts by Typology, FY 2023

In FY 2023	211 districts	with active levies collected income taxes totaling	\$684 million
This represents	30%	of their local operating revenue and an average of	\$2,260 per pupil

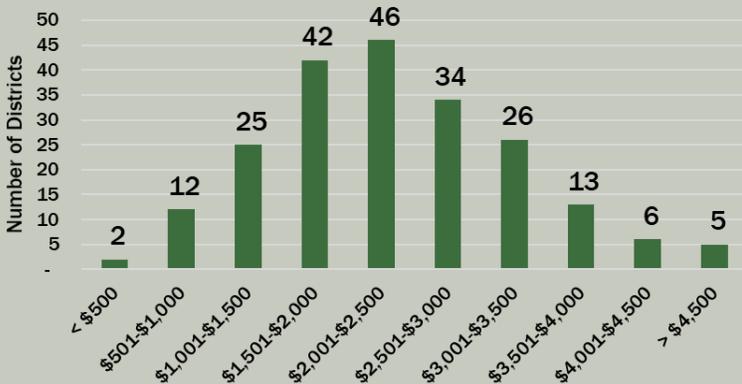

70%

of income tax districts collected \$1,000 to \$3,000 per pupil from the tax

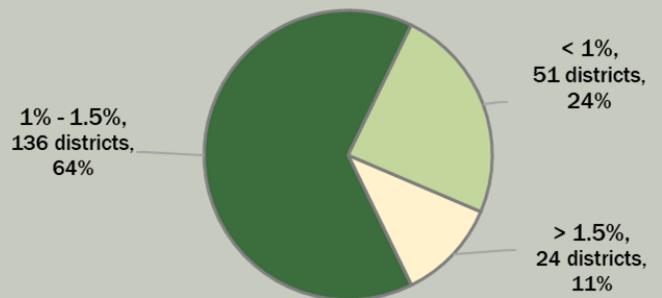

64%

of income tax districts levy rates between 1% and 1.5%

Distribution of Income Tax per Pupil, FY 2023

Distribution of School District Income Tax Rates, FY 2023

Very small per-pupil amounts (\$200 or less) often indicate the beginning or ending of a levy. One district began levying an income tax in FY 2023.

2.0% is the highest tax rate levied (5 districts); 0.25% is the lowest (2 districts)

Income tax revenue equated to a median property tax rate of **11 mills**

70%

of income tax districts tax residents' Ohio adjusted gross income (AGI)

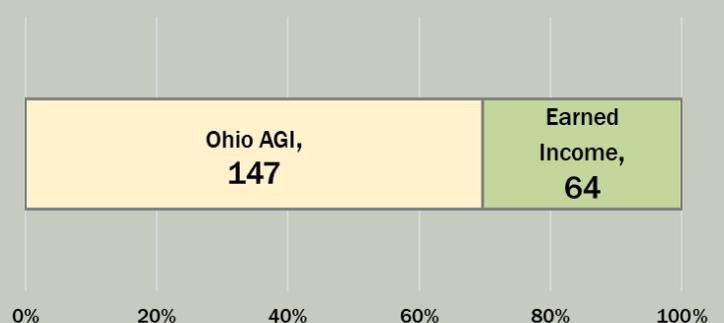

30%

of income tax districts tax residents' earned income

Distribution of Effective Millage of School District Income Taxes, FY 2023

Share of Districts by Income Tax Basis, FY 2023

Income tax levies are not included in the 20-mill floor calculation. Income tax districts tend to be on the floor, supplementing property tax revenues with income tax revenues.

Earned income includes only wages, salaries, and self-employment income. Ohio AGI adds tips, interest, dividends, and several other categories, making for a larger tax base.
